RELIABLE GEAR FOR REAL AVIATORS

FLIGHT OUTFITTERS HEADLAMP

Flying at night can be a daunting task. Having both hands free to handle the workload during these tense situations is extremely important. This dual color headlamp puts the right type of light right where you need it without tying up your hands. Dual switches allow you to turn on just the white light, or just the red light. This means you don't have to scroll through different lights and ruin your night vision. Each color of light has a high and low setting to maximize battery life. Uses 3AAA batteries (included).

FO-HEADLAMP \$29.95
